Economic profile of Vietnam

- In 2024, the economy had a total GDP of EUR 407.9 billion
- GDP per capita PPP reached EUR 14,000 in 2024
- Vietnam has exhibited consistent
 economic growth, with an average annual
 rate reaching almost 7% over the past
 decades
- Manufacturing remains the key economic sector, representing 27% of the annual GDP
- Other notable sectors include Wholesale, retail trade, restaurants, and hotels and Agriculture, hunting, forestry, and fishing (both 13%)

Economic profile of Vietnam

Vietnam's export sector composition by share of total exports (2023)

Source: ECCP (2025), own calculation based on Atlas of Economic Complexity.

- **Electronics (43%)** were the most exported good in 2023, reflecting its status as a major player in global mobile phone production
- Despite a slight decline that the sector is facing, Textiles (20%) stood second
- Machinery (13%) was the third largest export, highlighting Vietnam's growing industrial capacity
- Together, Electronics and Machinery underscore Vietnam's competitive edge in manufacturing

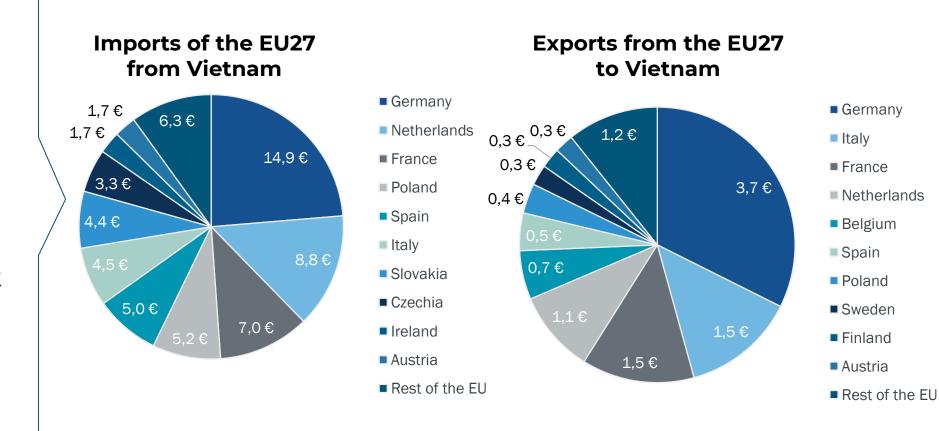

EU 27 and Vietnam: Analysis of business & value

- Trade concentration: Germany (€14.9 billion) and the Netherlands (€8.8 billion) are Vietnam's main EU trading partners for imports, while Germany (€3.7 billion) and Italy (€1.5 billion) lead EU exports to Vietnam
- **Import structure:** Key imports of the EU from Vietnam include telephone sets, footwear, and coffee
- **Export structure:** EU exports to Vietnam are dominated by machinery and transport equipment (40% of traded goods), and health-related products
- Framework: The EU-Vietnam Free Trade Agreement (EVFTA) from 2020 aims to eliminate 99% of tariffs, facilitating trade by reducing regulatory barriers and bolstering EU-Vietnam economic ties

Vietnam Cluster landscape and policy

Vietnam's cluster Landscape

- Vietnam's cluster landscape is divided into 4 Key Economic Regions (KERs) featuring 431 Industrial Parks, with 301 fully operational
- Vietnam's early cluster policy evolved from attracting FDI in industrial zones to innovation-driven clusters, including Digital and Eco-Industrial Parks, advancing Industry 4.0
- The **new cluster policy framework** established in 2024 introduces a unified cluster development framework
- This policy targets cluster members, cluster
 management and so-called 'technical infrastructure
 investors' and supports existing clusters and the
 foundation of new clusters
- The policy's sectoral focus is on manufacturing, digital technologies and ICT, as well as local industries

Outlook: Potential for future EU-Vietnam collaboration

Vietnam's robust manufacturing sector and EU ties make it an ideal hub for cluster collaboration in digital technologies and electronics.

- Strong economic development: With a GDP of €407.9 billion, GDP per capita (PPP) of €14,000 and strong economic growth, Vietnam is one of Southeast Asia's largest economies, contributing significantly to the region's GDP, with strong exports in Electronics, Textiles and Machinery.
- **Strengthening Value Chains:** Vietnam is the EU's top Southeast Asian trading partner, with a diverse export portfolio including key value chains in the industrial ecosystems Electronics, Textiles and Health.
- **Deepening EU-Vietnam ties:** EU-Vietnam ties have been enhanced through the EU-Vietnam Free Trade Agreement (EVFTA)
- **Dynamic cluster engagement:** Vietnam's evolving cluster landscape provides a foundation for enhanced collaboration with the EU, supported by tools like the ECCP for expanding sectoral partnerships.
