# Success Story

## FINANCIAL SUPPORT PROGRAM

**breaz**

*"BioMan4R2 program has been invaluable in giving us access to key resources that would otherwise be difficult to justify at this stage. With this support, we can avoid costly mistakes early in our development, ultimately saving the company money in the long run. Additionally, it has allowed us to build essential knowledge within the company and expand our European collaborations, positioning us for long-term success."*

Co-funded by

## RESILIENCE FOR REGIONAL BIOMANUFACTURING AND MEDICAL TECHNOLOGY ECOSYSTEM

*"This program has significantly impacted the ecosystem by fostering resilience. By providing support to us, a hardware medical device manufacturer -one of the few in our ecosystem- the program enables us to share the knowledge we gain through local networks. This collective knowledge-sharing reduces the barriers for other startups to enter the market, promoting a more accessible and collaborative environment. As a result, the program helps drive innovation and strengthens the ecosystem by making it more adaptable and inclusive for new companies."*

## IMPACT

*"The FSP has been crucial in enabling us to collaborate with a CRO, an opportunity that wouldn't have been possible at our current development stage. This collaboration helps us define our regulatory paths and strategically allocate the resources needed to navigate them. The program accelerates our path to market entry, allowing us to make an impact sooner and more efficiently, while also positioning us to plan effectively for future markets."*
