

BIOMAN<sup>4R2</sup>

# Success Story

## FINANCIAL SUPPORT PROGRAM

*"The funded project seeks to develop and integrate MAGIC, our innovative diagnostic method, into an intuitive software platform. This solution aims to enhance the precision of cancer treatment by accurately measuring genomic instability, thereby improving patient outcomes."*

Co-funded by  
the European Union

## RESILIENCE FOR REGIONAL BIOMANUFACTURING AND MEDICAL TECHNOLOGY ECOSYSTEM

*“The financial support program has significantly bolstered ecosystem resilience by enhancing the precision of cancer therapies and enabling the integration of accurate biomarkers in clinical trials. These advancements have strengthened the regional BMT ecosystem, empowering it to deliver cutting-edge and highly effective medical solutions.”*

## BUSINESS IMPACT

*“BioMan4R2 has significantly impacted MAGIC by accelerating the development and commercialization of its software, thereby enhancing its capacity to deliver personalized cancer treatment solutions. This support has also strengthened MAGIC's market position and improved its ability to attract additional investments, fostering sustained growth and innovation.”*
